159. Phytomyza tenella Meigen.  
**Iceland records:**  
Phytomyza tenella Lindroth 1941 p. 314.  
Phytomyza tenella Rydén 1945 p. 164.  
**Occurrence in Iceland:** N.: Innalands north of Saudár-  
Krokur, Skólaholtur, Mælifell, and Sørarárdalur, all in Skagafjarðar  
Rýslan; Stóolumes, Mývatn (Lth.). E.: Egilsstaðir (Rýd.).  
Skátalavatn (Lth.).  
**Distribution:** Europe to northernmost Scandinavia; the British  
Isles; the Azores, Madeira, the Canaries.  
**Biology:** June 3rd to Aug. 29th. In bags and near hot springs.

160. Phytomyza variipes Macquart.  
Phytomyza variipes Hendel 1916 (Lindner 50) p. 485–86, fig. 493, taf. XVI fig. 163.  
**Iceland records:**  
Phytomyza variipes Lindroth 1941 p. 311.  
**Occurrence in Iceland:**  
**Distribution:** Europe to central Sweden and Finland. Mining  
**Biology:** In meadows and heaths, and also near hot springs. June  
30th to Aug. 8th.  
Larvae of *Aegomyza* which we are not able to determine to species  
were found at Mælifell (N.) in a bog, July 14th; and at Langavatnskógar  
(E.) in birch scrub, July 14th. In both cases in the soil.

161. Osinella fruticeti Linné.  
Osinella fruticeti Duda 1932 (Lindner 61) p. 228–29, taf. 11 fig. 11.  
**Iceland record:**  
Osinella fruticeti Lindroth 1931 p. 308.  
**Occurrence in Iceland:** N.: Blönduós, Húnavatn, Hjerða-  
vötn, Mælifell, Bústaður, and Aðar in Skagafjarðar  
Rýslan; Hafnarfjörður, Akureyri, Sandur, Akrafjallar, Stóolumes, Mývatn (Lth.).  
**Distribution:** Europe to central Sweden and Finland. Mining  
**Biology:** In meadows and heaths, and also near hot springs. June  
30th to Aug. 8th.  
Larvae of *Aegomyza* which we are not able to determine to species  
were found at Mælifell (N.) in a bog, July 14th; and at Langavatnskógar  
(E.) in birch scrub, July 14th. In both cases in the soil.

32. Fam. Cordyluridae.  
162. Scatophaga furcata Say.  
Scatophaga squamosa Suck 1937 (Lindner 62a) p. 57–58.  
**Iceland record:**  
Scatophaga furcata Hálafordarói & Mesnil 1938 p. 91, fig. 663.
